

**Applications & Benefits of the CNCE™
(actual site measurements)**

Load profiles are similar at each panel

Current THD = 106%

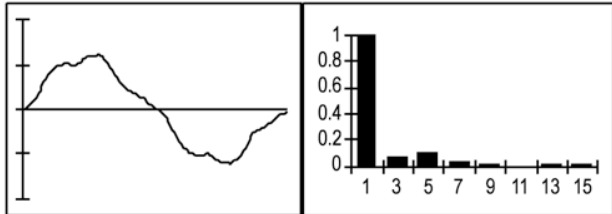

K-factor = 12

Net Result:

Current THD = 14%

K-factor = 1.3

Typical CNCE Performance

Neutral Current	90% reduction
Neutral-Ground Voltage	90% reduction
Load Imbalance	70% reduction
Heaviest Phase Current	15% reduction
K-factor of load	90% reduction
Voltage Distortion	80% reduction

Effect of CNCE™ on Voltage Distortion
